INDEX OF AUTHORS

VOLUME XX

TRANSACTIONS OF AMERICAN SOCIETY FOR STEEL TREATING

July, 1932—December, 1932

A

Arness, W. B. 429

B

Bain, Edgar Collins 385
Barsky, George 347
Bleakney, H. H. 321
Brophy, G. R. 58

C

Canfield, R. H. 549
Clark, George L. 471

E

Ellinger, George A. 263
Enos, George M. 27

F

Findley, J. K. 97
French, H. J. 481

G

Goss, Norman P. 314, 471

H

Honda, Kotaro 464
Harrington, R. H. 529
Harvey, Wilber E. 177
Homerberg, V. O. 481

K

Keshian, H. G. 233

L

Lord, James Osborn 1

M

Mathewson, C. H. 357

N

Nishiyama, Zenji 464

O

Ostrofsky, J. N. 429

R

Reed, Everett L. 115
Ritchie, S. B. 193

S

Samans, C. H. 357
Sanford, Raymond L. 263
Sawin, N. N. 249
Spire, E. 357
Stachrowski, E. 249
Stoughton, Bradley 177

W

Westgren, Arne 507
Wills, W. H. 97
Wood, W. P. 529

Y

Yap, Chu-Phay 289

Z

Ziegler, N. A. 73

INDEX OF SUBJECTS AND AUTHORS OF PAPERS

VOLUME XX

TRANSACTIONS OF AMERICAN SOCIETY FOR STEEL TREATING

July, 1932—December, 1932

A

Allotropy in Iron and Steel—*R. H. Harrington and W. P. Wood* 529
Alloys; Internal Friction in Iron and Iron—*R. H. Canfield* 549
Alloys; Structure Analogies of—*Arne Westgren* 507
Alloys in Various Media, 1. Salt Spray Test; Corrosion Resistance of Iron-Chromium—*W. B. Arness and J. N. Ostrofsky* 429
Analogies of Alloys; Structure—*Arne Westgren* 507
Apparatus; Comparative Tests of Hardened Steel by Means of Penetration Testing—*N. N. Sawin and E. Stachrowski* 249
Application in the Study of Tempering of Quenched 0.75 Per Cent Carbon Steel; Thermomagnetic Phenomena in Steel and Their—*Raymond L. Sanford and George A. Ellinger* 263

B

Banding in Steel; Microscopic Study of Effects of Heat Treatment Upon Ferrite—*Wilber E. Harvey and Bradley Stoughton* 177
Basic Open-Hearth Wires by X-Ray Diffraction Methods; Comparative Study of Low Carbon Bessemer and—*Norman P. Goss* 314
Baths; The Chemistry of Liquid Hardening—*George Barsky* 347
Bessemer and Basic Open-Hearth Wires by X-ray Diffraction Methods; Comparative Study of Low Carbon—*Norman P. Goss* 314
Binary and Ternary Systems; Division of the Iron-Vanadium Oxygen System Into Some of Its Constituent—*C. H. Mathewson, E. Spire and C. H. Samans* 357
Brittleness in Low Carbon Steel—*H. H. Bleakney* 321

C

Campbell Lecture; Edward DeMille 385
Carbide; The Surface Energy of Iron—*Yap, Chu-Phay* 289
Carbon Content; X-Ray Studies of Steel Wires of Medium—*Norman P. Goss and George L. Clark* 471
Carbon Content of the Iron-Carbon Eutectoid; Influence of Special Elements on the—*Everett L. Reed* 115
Carbon Steel; Brittleness in Low—*H. H. Bleakney* 321
Carbon Steel; Thermomagnetic Phenomena in Steel and Their Application in the Study of Tempering of Quenched 0.75 Per Cent—*Raymond L. Sanford and George A. Ellinger* 263
Carburizing Compounds; The Role of Energizers in—*George M. Enos*.. 27
Characteristics of Deformation of Steel Under Constant Load at Elevated Temperatures—*G. R. Brophy* 58
Chemistry of Liquid Hardening Baths—*George Barsky* 347
Chromium Alloys in Various Media, 1. Salt Spray Test; Corrosion Resistance of Iron—*W. B. Arness and J. N. Ostrofsky* 429
Chromium-Nickel Steel Wire; Manufacture, Properties, and Uses of 18-8—*W. H. Wills and J. K. Findley* 97
Comparative Study of Low Carbon Bessemer and Basic Open-Hearth Wires by X-Ray Diffraction Methods—*Norman P. Goss* 314

Comparative Tests of Hardened Steel by Means of Penetration Testing Apparatus—*N. N. Sawin and E. Stachrowski* 249
Compounds; The Role of Energizers in Carburizing—*George M. Enos*.. 27
Constant Load at Elevated Temperatures; The Characteristics of Deformation of Steel Under—*G. R. Brophy* 58
Constituent Binary and Ternary Systems; Division of the Iron-Vanadium-Oxygen System Into Some of Its—*C. H. Mathewson, E. Spire and C. H. Samans* 357
Consumer's Standpoint; Tool Steel From the—*H. G. Keshian* 233
Corrosion Resistance of Iron-Chromium Alloys in Various Media, 1. Salt Spray Test—*W. B. Arness and J. N. Ostrofsky* 429
Cubic Martensites; Nature of the Tetragonal and—*Kotaro Honda and Zenji Nishiyama* 464

D

Deformation of Steel Under Constant Load at Elevated Temperatures; The Characteristics of—*G. R. Brophy* 58
Diffraction Methods; Comparative Study of Low Carbon Bessemer and Basic Open-Hearth Wires by X-Ray—*Norman P. Goss* 314
Division of the Iron-Vanadium-Oxygen System Into Some of Its Constituent Binary and Ternary Systems—*C. H. Mathewson, E. Spire and C. H. Samans* 357

E

Effects of Heat Treatment Upon Ferrite Banding in Steel; Microscopic Study of—*Wilber E. Harvey and Bradley Stoughton* 177
Elements on the Carbon Content of the Iron-Carbon Eutectoid; Influence of Special—*Everett L. Reed* 115
Elevated Temperatures; The Characteristics of Deformation of Steel Under Constant Load at—*G. R. Brophy* 58
Energizers in Carburizing Compounds; The Role of—*George M. Enos* 27
Eutectoid; Influence of Special Elements on the Carbon Content of the Iron-Carbon—*Everett L. Reed* 115

F

Factors Affecting the Inherent Hardenability of Steel—*Edgar Collins Bain* 385
Ferrite Banding in Steel; Microscopic Study of Effects of Heat Treatment Upon—*Wilber E. Harvey and Bradley Stoughton* 177
Friction in Iron and Iron Alloys; Internal—*R. H. Canfield* 549

H

Hardenability of Steel; Factors Affecting the Inherent—*Edgar Collins Bain* 385
Hardened Steel by Means of Penetration Testing Apparatus; Comparative Tests of—*N. N. Sawin and E. Stachrowski* 249
Hardening Baths; The Chemistry of Liquid—*George Barsky* 347
Heat Treatment Upon Ferrite Banding in Steel; Microscopic Study of Effects of—*Wilber E. Harvey and Bradley Stoughton* 177

I

Influence of Special Elements on the Carbon Content of the Iron-Carbon Eutectoid—*Everett L. Reed* 115
Inherent Hardenability of Steel; Factors Affecting—*Edgar Collins Bain* 385
Internal Friction in Iron and Iron Alloys—*R. H. Canfield* 549
Iron; Solubility of Oxygen in Solid—*N. A. Ziegler* 73
Iron Alloys; Internal Friction in Iron and—*R. H. Canfield* 549
Iron and Iron Alloys; Internal Friction in—*R. H. Canfield* 549

Iron and Steel; Allotropy in—*R. H. Harrington and W. P. Wood* 529
Iron Carbide; The Surface Energy of—*Yap, Chu-Phay* 289
Iron-Carbon Eutectoid; Influence of Special Elements on the Carbon Content of the—*Everett L. Reed* 115
Iron-Chromium Alloys in Various Media, 1. Salt Spray Test; Corrosion Resistance of—*W. B. Arness and J. N. Ostrofsky* 429
Iron-Vanadium-Oxygen System Into Some of Its Constituent Binary and Ternary Systems; Division of the—*C. H. Mathewson, E. Spire and C. H. Samans* 357

L

Liquid Hardening Baths; Chemistry of—*George Barsky* 347
Load at Elevated Temperatures; The Characteristics of Deformation of Steel Under Constant—*G. R. Brophy* 58
Low Carbon Bessemer and Basic Open-Hearth Wires by X-Ray Diffraction Methods; Comparative Study of—*Norman P. Goss* 314
Low Carbon Steel; Brittleness in—*H. H. Bleakney* 321
Low Magnification; Photomicrographs at—*James Osborn Lord* 1

M

Magnification; Photomicrographs at Low—*James Osborn Lord* 1
Manganese; Steels Made Without—*S. B. Ritchie* 193
Manganeseless Steels—*S. B. Ritchie* 193
Manufacture, Properties, and Uses of 18-8 Chromium-Nickel Steel Wire—*W. H. Wills and J. K. Findley* 97
Martensites; Nature of the Tetragonal and Cubic—*Kotaro Honda and Zenji Nishiyama* 464
Media, 1. Salt Spray Test; Corrosion Resistance of Iron-Chromium Alloys in Various—*W. B. Arness and J. N. Ostrofsky* 429
Microscopic Study of Effects of Heat Treatment Upon Ferrite Banding in Steel—*Wilber E. Harvey and Bradley Stoughton* 177

N

Nature of the Tetragonal and Cubic Martensites—*Kotaro Honda and Zenji Nishiyama* 464
Nickel in Nitriding Steels; Role of—*H. J. French and V. O. Homerberg*.. 481
Nickel-Chromium Steel Wire; Manufacture, Properties, and Uses of 18-8 —*W. H. Wills and J. K. Findley* 97
Nitriding Steels; Role of Nickel in—*H. J. French and V. O. Homerberg*.. 481

O

Open-Hearth Wires by X-Ray Diffraction Methods; Comparative Study of Low Carbon Bessemer and Basic—*Norman P. Goss* 314
Oxygen in Solid Iron; Solubility of—*N. A. Ziegler* 73
Oxygen-Vanadium-Iron System; Division of Into Some of Its Constituent Binary and Ternary Systems—*C. H. Mathewson, E. Spire and C. H. Samans* 357

P

Penetration Testing Apparatus; Comparative Tests of Hardened Steel by Means of—*N. N. Sawin and E. Stachrowski* 249
Phenomena in Steel and Their Application in the Study of Tempering of Quenched 0.75 Per Cent Carbon Steel; Thermomagnetic—*Raymond L. Sanford and George A. Ellinger* 263
Photomicrographs at Low Magnification—*James Osborn Lord* 1
Properties, Manufacture, and Uses of 18-8 Chromium-Nickel Steel Wire —*W. H. Wills and J. K. Findley* 97

Q

Quenched 0.75 Per Cent Carbon Steel; Thermomagnetic Phenomena in Steel and Their Application in the Study of Tempering of—*Raymond L. Sanford and George A. Ellinger* 263

R

Resistance of Iron-Chromium Alloys in Various Media, 1. Salt Spray Test; Corrosion—*W. B. Arness and J. N. Ostrofsky* 429
Role of Energizers in Carburizing Compounds—*George M. Enos* 27
Role of Nickel in Nitriding Steels—*H. J. French and V. O. Homerberg*.. 481

S

Salt Spray Test; Corrosion Resistance of Iron-Chromium Alloys in Various Media, 1—*W. B. Arness and J. N. Ostrofsky* 429
Solid Iron; Solubility of Oxygen in—*N. A. Ziegler* 73
Solubility of Oxygen in Solid Iron—*N. A. Ziegler* 73
Special Elements on the Carbon Content of the Iron-Carbon Eutectoid; Influence of—*Everett L. Reed* 115
Spray Test; Corrosion Resistance of Iron-Chromium Alloys in Various Media, 1. Salt—*W. B. Arness and J. N. Ostrofsky* 429
Steel; Allotropy in Iron and—*R. H. Harrington and W. P. Wood* 529
Steel; Brittleness in Low Carbon—*H. H. Bleakney* 321
Steel; Factors Affecting Inherent Hardenability of—*Edgar Collins Bain* 385
Steel; Microscopic Study of Effects of Heat Treatment Upon Ferrite Banding in—*Wilber E. Harvey and Bradley Stoughton* 177
Steel, Penetration Testing Apparatus; Comparative Hardness Tests—*N. N. Sawin and E. Stachrowski* 249
Steel; Thermomagnetic Phenomena and Their Application in the Study of Tempering of Quenched 0.75 Per Cent Carbon Steel—*Raymond L. Sanford and George A. Ellinger* 263
Steels; Role of Nickel in Nitriding—*H. J. French and V. O. Homerberg* 481
Steel From the Consumer's Standpoint; Tool—*H. G. Keshian* 233
Steel Under Constant Load at Elevated Temperatures; The Characteristics of Deformation of—*G. R. Brophy* 58
Steel Wire; Manufacture, Properties, and Uses of 18-8 Chromium-Nickel —*W. H. Wills and J. K. Findley* 97
Steel Wires of Medium Carbon Content; X-Ray Studies of—*Norman P. Goss and George L. Clark* 471
Steels Made Without Manganese—*S. B. Ritchie* 193
Structure Analogies of Alloys—*Arne Westgren* 507
Studies of Steel Wires of Medium Carbon Content; X-Ray—*Norman P. Goss and George L. Clark* 471
Study of Effects of Heat Treatment Upon Ferrite Banding in Steel; Microscopic—*Wilber E. Harvey and Bradley Stoughton* 177
Study of Low Carbon Bessemer and Basic Open-Hearth Wires by X-Ray Diffraction Methods; Comparative—*Norman P. Goss* 314
Study of Tempering of Quenched 0.75 Per Cent Carbon Steel; Thermomagnetic Phenomena in Steel and Their Application in the—*Raymond L. Sanford and George A. Ellinger* 263
Surface Energy of Iron Carbide—*Yap, Chu-Phay* 289

T

Temperatures; The Characteristics of Deformation of Steel Under Constant Load at Elevated—*G. R. Brophy* 58
Tempering of Quenched 0.75 Per Cent Carbon Steel; Thermomagnetic Phenomena in Steel and Their Application in the Study of—*Raymond L. Sanford and George A. Ellinger* 263

Ternary System; Division of the Iron-Vanadium-Oxygen System Into Some of Its Constituent Binary and—*C. H. Mathewson, E. Spire and C. H. Samans* 357
Test; Corrosion Resistance of Iron-Chromium Alloys in Various Media, 1. Salt Spray—*W. B. Arness and J. N. Ostrofsky* 429
Testing Apparatus; Comparative Tests of Hardened Steel by Means of Penetration—*N. N. Sawin and E. Stachrowski* 249
Tests of Hardened Steel by Means of Penetration Apparatus; Comparative—*N. N. Sawin and E. Stachrowski* 249
Tetragonal and Cubic Martensites; Nature of—*Kotaro Honda and Zenji Nishiyama* 464
Thermomagnetic Phenomena in Steel and Their Application in the Study of Tempering of Quenched 0.75 Per Cent Carbon Steel—*Raymond L. Sanford and George A. Ellinger* 263
Tool Steel From the Consumer's Standpoint—*H. G. Keshian* 233

V

Vanadium-Oxygen-Iron System; Division of Some of Its Constituent Binary and Ternary Systems—*C. H. Mathewson, E. Spire and C. H. Samans* 357

W

Wire; Manufacture, Properties, and Uses of 18-8 Chromium-Nickel Steel —*W. H. Wills and J. K. Findley* 97
Wires by X-Ray Diffraction Methods; Comparative Study of Low Carbon Bessemer and Basic Open-Hearth—*Norman P. Goss* 314
Wires of Medium Carbon Content; X-Ray Studies of Steel—*Norman P. Goss and George L. Clark* 471

X

X-Ray Diffraction Methods; Comparative Study of Low Carbon Bessemer and Basic Open-Hearth Wires by—*Norman P. Goss* 314
X-Ray Studies of Steel Wires of Medium Carbon Content—*Norman P. Goss and George L. Clark* 471
